Digital Denmark

- the underpinning of a
strong life science sector

May 2019

MINISTRY OF INDUSTRY, BUSINESS
AND FINANCIAL AFFAIRS

Digital Denmark

- Life Science as a political priority
- Opportunities
- The challenges
- Danish Examples

VISION

Denmark as a leading life science nation in Europe

National Growth Strategy for Life Science

Attractive to conduct R&D in DK

More clinical research to DK

A top-class Danish Medicines Agency

Better access to skilled labour

More start-ups and digital transformation

Targeted internationalization efforts

A life science office in the Ministry of Industry, Business and Financial Affairs

A Life Science office in the Ministry of Industry, Business and Financial Affairs

Primary task:

- Implementation of the life science growth strategy
- Ministerial service
- Analysis and benchmarks
- Initiative about innovative procurement
- Dialogue with stakeholders

In-house acces to policy areas such as:

- Financing
- Patents and EU-related matters
- Digitalisation
- International labour force
- Business promotion
- Administrative burdens

Health Challenges Denmark vs. Canada

Current expenditure on health

(Pct. of GDP, 2017)

Hospital beds

(Per 1000 population, 2016)

Medical graduates

(per 100.000 population, 2016)

Denmark

10,4 pct.

2 pct. rise 1980-2017

2,6

1,7 hospital bed less since 2000

22,1

9,7 graduate more since 1980

8,8
OECD
average

4,7
OECD
average

12,0
OECD
average

Canada

10,2 pct.

3,6 pct. rise 1980-2017

2,6

1,2 hospital bed less since 2000

7,9

0,8 graduate more since 1980

Status quo is not an option

Changed demography

More elderly and chronic patients require new and efficient treatments

New players

Multinational tech companies, real world data from sensors, devices, PROs, and SoMe

Lack of resources

Too few doctors, nurses and skilled personal

MINISTRY OF INDUSTRY, BUSINESS
AND FINANCIAL AFFAIRS

Digital transformation

What are the Danish opportunities?

Why digitalisation?

- Productivity and prosperity
- Rapid change are well suited to a small, open, flexible and innovative country
- It already affect industries, such as life science, the financial sector and the maritime industries

The Digital Economy and Society Index (DESI)

DESI-Score	2018
DNK	0,72
SWE	0,70
FIN	0,70
NLD	0,70
IRL	0,61
UK	0,61
BEL	0,61
EST	0,60
ESP	0,58
AUT	0,58
OECD	0,56
DEU	0,56
SVN	0,53
PRT	0,53
CZE	0,52
FRA	0,52
LVA	0,51
SVK	0,49
HUN	0,47
POL	0,45
ITA	0,44
GRC	0,38

The index: Five dimensions and 40 indicators:

- a) Digital public services
- b) Internet use
- c) digital skills
- d) digital infrastructure
- e) use of digital technology in companies

Strenghts in Denmark

Very good healthdata

High quality data available for long periods of time, and the personal identification number makes it possible to link data across registers.

High trust level

Danes have a large trust in public authorities and a willingness to share their healthcare data*

*Population Health Management:
Deling af patientdata (KMD, August 2017)

Universal healthcare

Denmark has free and equal access to healthcare for all citizens. This is financed by general taxes

What makes Danish Health Data unique?

**A long tradition of
collecting and utilizing
Health Data**

**Comprehensive
Health Data registries**

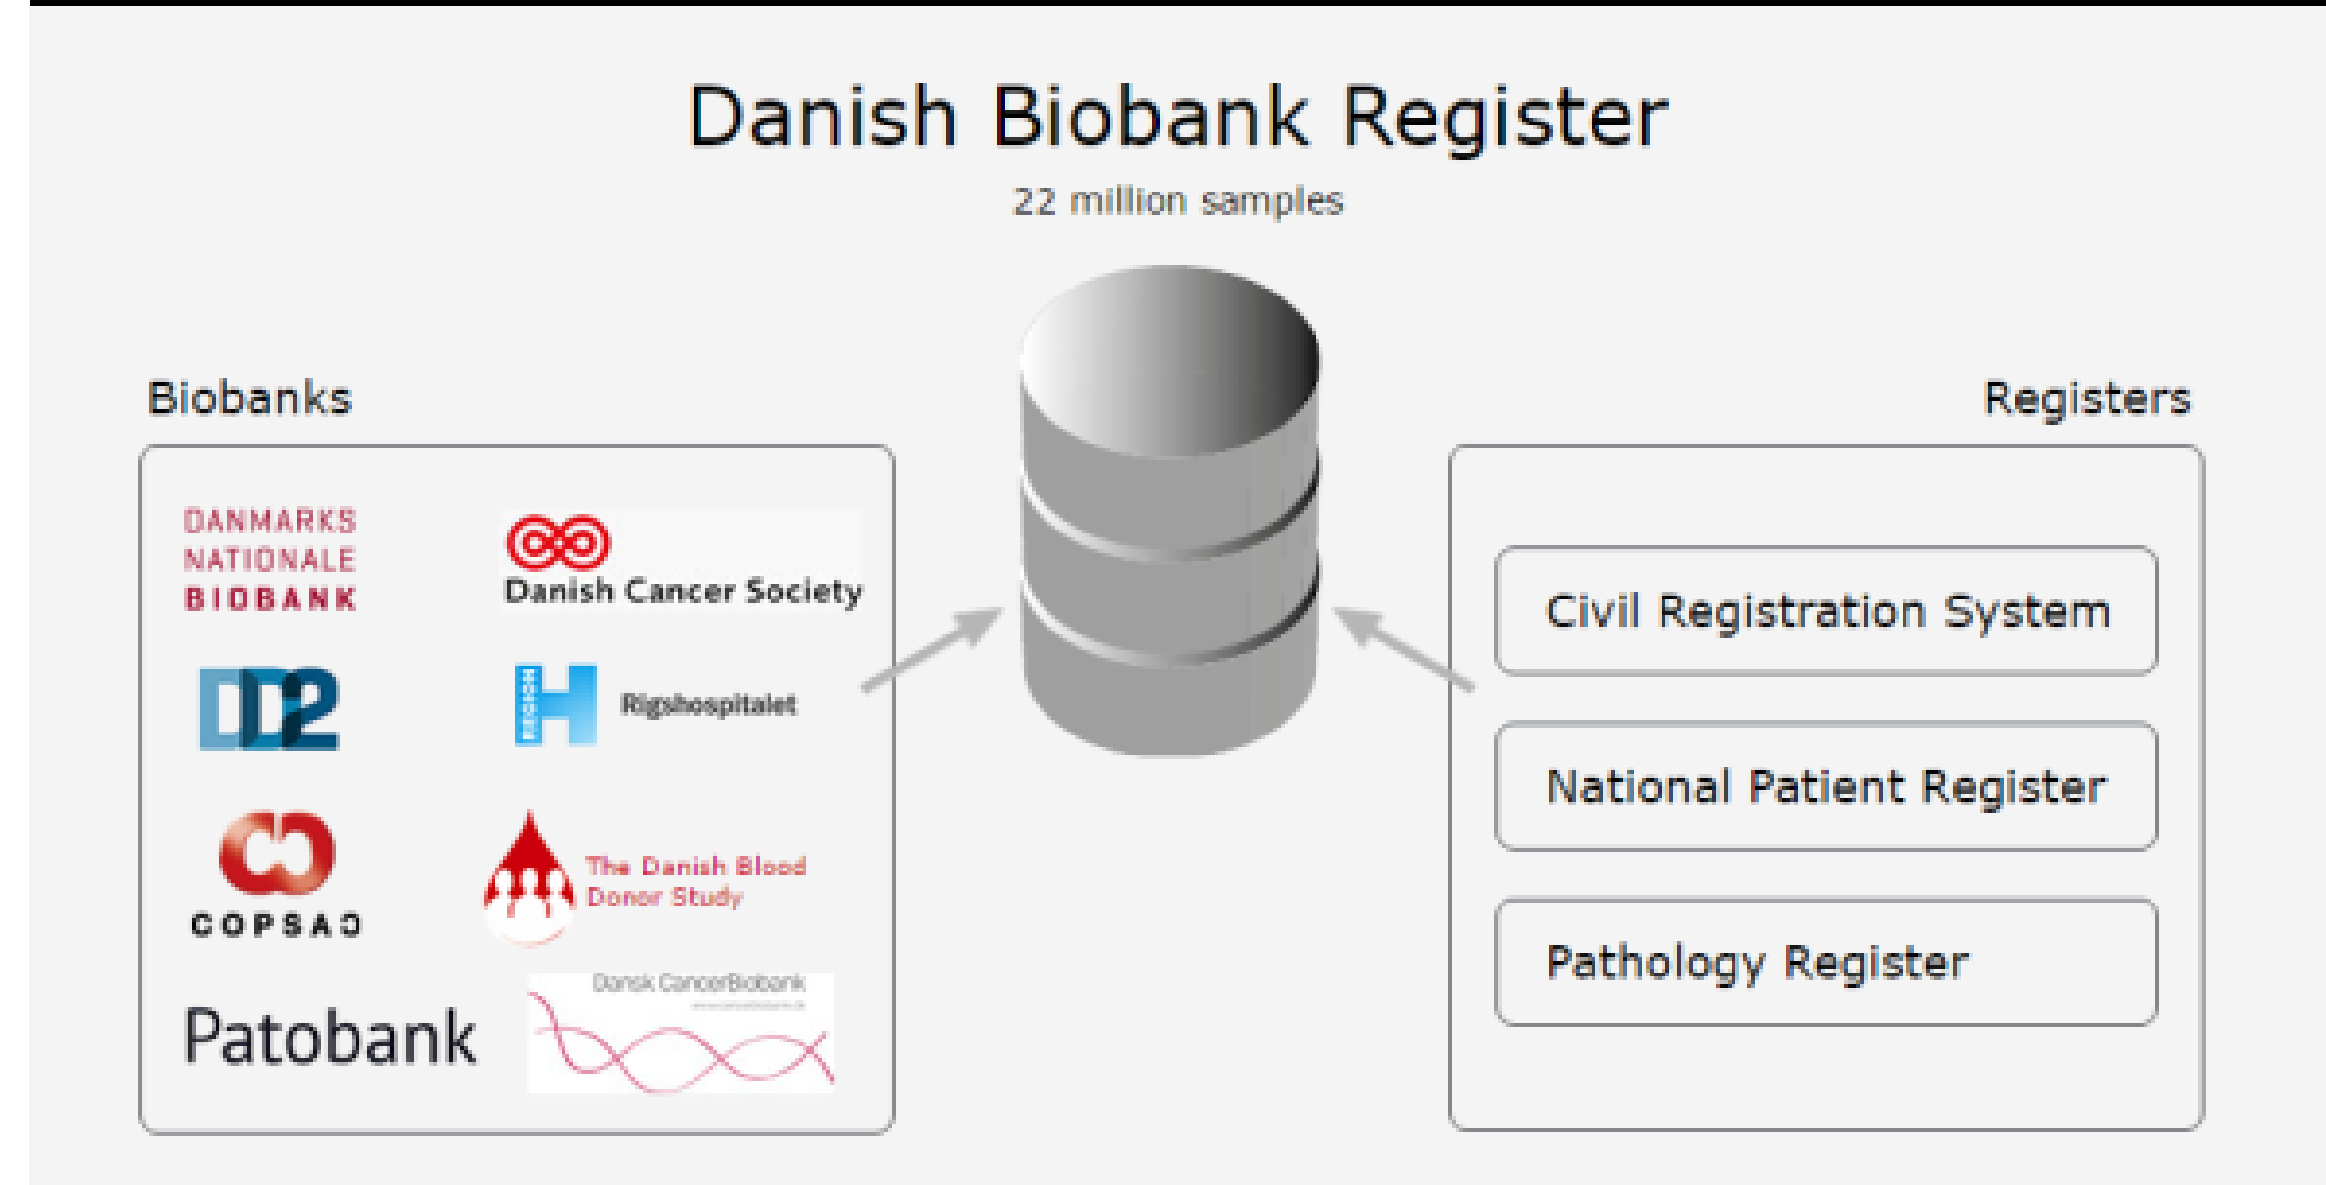

**A unique Central
Person Registry**

An example:

Danish National Biobank

The Danish National Biobank is one of the most advanced and comprehensive of its kind

Source: Danish National Biobank

- Samples and health data from all major biobanks and databases
- 22 mio. samples from 6 mio. people
- 500.000 new samples in the biobank every year
- All health data are anonymized
- Researchers have online access to combined data from all the biobanks participating in the biobank initiative

Another example:

More than 160
databases

OVERVIEW OF 160 DATABASES

Explore the
Danish Health Data

Find health data

Search for health data

... OR CHOOSE A CATEGORY

- Accidents and cause of death
- Administration
- Autoimmune diseases
- Biological material
- Cancer
- Cardiovascular disease
- Children and adolescents
- Chronic diseases
- Dermatology

SHOWING 5 out of 160 databases

Harnessing the best health data in the world

Examples of the use of health data in
Denmark

1/3

AI helps medical dispatchers identify cardiac arrests patients

Harnessing the best health data in the world

(EMS examples)

150 more patients now being recognized prior to the ambulance arriving

Electronic patient records in Danish ambulances

Harnessing the
best health data
in the world

(EMS examples)

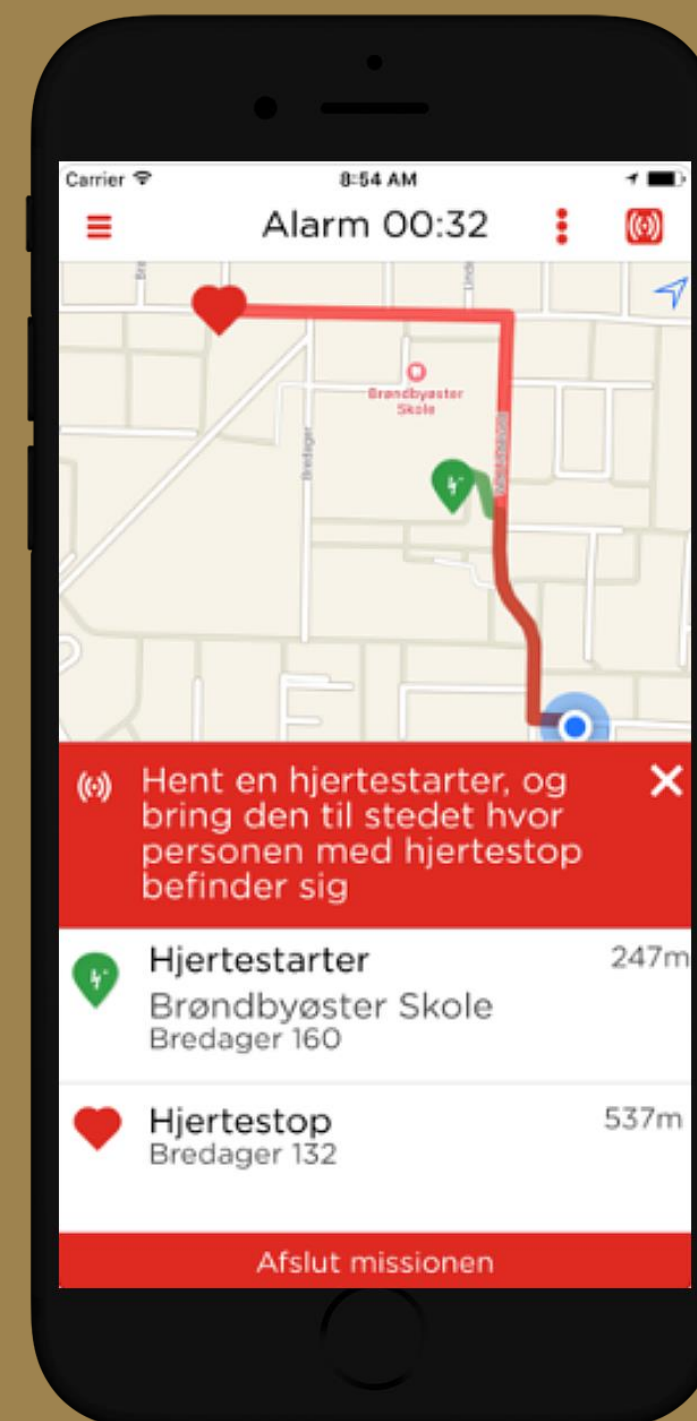

"Heart runner" app

Harnessing the best health data in the world

(EMS examples)

Central Personal Registry – the unique identifier

Harnessing the
best health data
in the world

- Unique identifier that enables medical research based on historical data from the last 40-50 years
- Combines data and information about an individual person
- Enables research from multiple health data registries
- **Combining data in multiple ways**
 - Pregnancy, labor and birth
 - Micro biological diagnosis
 - Use of medicine (consumption, habits, volume)
 - Vaccines
 - Schools and education
 - Family, residence and occupation
 - Test results from labs
 - Bio samples

Central Personal Registry – the unique identifier

Harnessing the
best health data
in the world

Higher Mortality
among patients
with severe
ulcers?

TRUE

Higher risk of blood clot
when using 3. & 4.
generation birth control
pills?

TRUE

Induced abortions
leading to a
higher risk of
breast cancer?

NOT TRUE

Higher risk of
developing cancer
when living near
high voltage power
lines?

NOT TRUE

**Harnessing the
best health data
in the world**

4
readmission
avoided

**Improving quality of life
for COPD patients**

Challenges going forward:

- The health data is stored in silos !

- +170 national registers and clinical databases
- Relevance to 98 municipalities across 60 hospitals
- Relevance to 245 pharmacies and 3500 GP's practicing in 2100 clinics nationwide
- Architecture currently not designed for collaborative use at scale
- Focus on volume and cost - instead of value
- Existing business models protect the current system

Data Saves Lives.

MAPPING THE HEALTHCARE DATA LANDSCAPE IN DENMARK
Report

Solutions

Data Map

Data Entry Point

Data Sandboxes

National Strategy for Precision Medicine

**Going
forward:**

**Unused
potentials to
be explored**

National Digital Health Strategy & Strategy for Responsible Use of Health Data

Going forward:
Unused potentials to be explored

Supporting the digital ecosystem

Going forward:

Unused potentials to be explored

- Analyses to shed light on companies' **possibilities** of using health data
- Develop **solutions** to the challenges that companies and researchers experience using health data in the form of, for example, public-private collaboration models
